

WINTER 2018

DATE	SPEAKER	TITLE	HOST
1/11/18	Moriel Zeligowsky	Neuropeptidergic control of stress-induced effects on fear and social behavior	Biology Dept
1/18/18	Ioana Carcea	Cortical modulation by behavioral and social context	Biology Dept
1/22/18	Athena Akrami	Parametric Working Memory and its multiple timescales - a rodent mode	Biology Dept
1/25/18	TBA	TBA	TBA
2/1/18	Qili Liu	Neural Plasticity and Motivational Drive: How Hunger and Sleepiness Persist in time	Biology Dept
2/8/18	Emily Sylwestrak	From RNA to reward: dissecting habenular circuit activity during motivated behavior	Biology Dept
2/12/18	Jim Heys	Neural representations of time and space underlying episodic memory	Biology Dept
2/15/18	Gul Dolen	Social reward learning: basic mechanisms and disease pathogenesis	Biology Dept
2/19/18	Bassam Atallah	Midbrain dopamine neurons control judgment of time: time flies when you are having fun	Biology Dept
3/15/18	Bingni Brunton	The brain outside the lab: Exploring the neural basis of long-term, naturalistic human behaviors	Matt Smear
